

Tigo Releases New Add-on to TS4 Platform with SMART Premium Monitoring Software

March 9, 2020

The TS4-A-M (Monitoring Add-on) streamlines PV maintenance, tracks production, and proves returns on investment.

Campbell, CA, March 9, 2020 – Tigo Energy, Inc.®, pioneer of the smart modular Flex MLPE platform, today announced a new addition to the add-on TS4 Platform - the TS4-A-M. This add-on module-level monitoring solution brings smart PV module technology and the highest granularity of production data to Tigo's residential, commercial & industrial, and utility customers.

With Tigo's monitoring solution, customers can choose between Premium or Free solar monitoring which offers various features into module-level data. Tigo's Premium Monitoring can be activated at no cost for 30 days so customers can access more granular module-level data, detailed production history, performance alerts, and advanced charts via Tigo's SMART website. To activate, download the Tigo SMART mobile app with a Tigo PV System via Google Play or Apple Store. To learn more, join Tigo's free online "Monitoring with TS4-A-M and Premium Subscription" webinar on Thursday, March 12th at 10am PT.

The highlights of the new TS4-A-M (Monitoring Add-on) with Premium monitoring include:

See power, voltage, and current data anywhere via the SMART website or app

View or download detailed charts of system energy production

Configure 3rd party Modbus devices like inverters and AC meters in the Tigo SMART app

Download data directly using the Tigo API

Be alerted via automatic email or SMS of faults or performance issues

Proactively maintain PV systems with a lower cost of ownership

Receive monthly or daily production reports

Track individual module performance to easily identify issues

Predict maintenance requirements to reduce labor time

"Tigo offers the most granular module-level data in the industry thanks to our UHD-Core technology within the TS4-A-M and other units with this monitoring feature," says Maxym Makhota, VP of Software Engineering at Tigo. "Plus, the Premium monitoring software is an absolute no-brainer for customers who want the easiest system maintenance, better visibility, and real-time data. Tigo is the only provider of Reclaimed Power in the market today."

Tigo is now taking orders for the TS4-A-M worldwide. For price and delivery, consult your preferred solar distributor, call Tigo at +1.408.402.0802, email sales@tigoenergy.com, or visit www.tigoenergy.com.

About Tigo

Tigo is a Silicon Valley company founded in 2007 by a team of experienced technologists. Combining a unique systems-level approach with expertise in semiconductors, power electronics, and solar energy, the Tigo team developed the first-generation Smart Module Optimizer technology for the solar industry. Tigo's vision is to leverage integrated and retrofitted Flex MLPE and communications technology to drive the cost of solar electricity down. By partnering with tier 1 module and inverter manufacturers in the industry, Tigo is able to focus on its key innovation with the smartest TS4 modular platform and leverage the broader ecosystem. Tigo has operations in the USA, Europe, Latin America, Japan, China, Australia, and the Middle East. Visit www.tigoenergy.com.
